Kee Klamp fittings allow easy installation and provide a strong grip. The fittings have a wide application range including but not limited to handrails, safety barriers, guardrails, store fixtures, fences, awnings, bleachers, playground equipment, grid systems, and customer guidance. A hex tool is used for assembly. Fittings have case hardened set screws with Kee Coat™ protective finish and are galvanized for corrosion resistance with low long term maintenance. Kee Klamp is designed to fit Schedule 40 pipe sizes 1/4" - 2".
